REQUEST FOR CORRECTED OFFICIAL FILING RECEIPT

Sir:

We acknowledge receipt of the Filing Receipt (copy enclosed) for the above-identified patent application. However, the title as reported on the Filing Receipt is incorrect. Please correct the errors as follows (corrections in bold and underscore).

The title of the application as filed (cover page attached) and reported on the Application Data Sheet (copy attached), should read:

Three-Dimensional Molded Part Having a Leather-Like Surface

As these errors are not due to the Applicants, no fee is due.

Thank you for your assistance.

Respectfully submitted,

By: Robert M. Siminski

Three-dimensional Molded Part Having a Leather-Like Surface

The invention relates to a method for preparing three-dimensional casting skins having a leather-like surface, and to the molded parts obtainable by such method.

The use of natural fibers in the automotive industry is steadily increasing. The main uses include rigid trim parts in the interior space and trunk. To date, vegetable fibers have been exclusively employed as the fibers. Fibers of animal origin, such as wool, silk or just leather fibers, have hardly been used to date, except for leather, of course.

In contrast to artificial leathers, which mostly consist of a PVC or polyurethane layer on a support woven or non-woven fabric, the main component of leather-fiber textile is leather fiber milled from leather scraps. It is held together by polymeric binders, such as natural latex, polyacrylates, polyvinyl acetates and their copolymers and various additives. The properties of the textile are determined by the kind of production, the density and, above all, by the components, i.e., leather fiber and binder. Since the effect of the leather fiber is quite prominent, it may be said that leather-fiber textile not only looks like leather, but also smells and feels like it. In contrast to leather, its properties are more uniform due to the usual production as sheeting.

To the end of the 1950's, leather-fiber textile was prepared by handicraft in so-called screen frames, but in the 1960's and 1970's, most plants converted to continuous production on modified endless-wire machines, as known from the paper industry.

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

264

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).
